

Pacific Coast Feather Company

Challenges & Objectives:

- Replace existing 20 ton roof top unit.
- Increase efficiency by removing platform existing unit rests upon and installing new unit on a new curb adaptor.

Results:

- After removing existing unit and installing new unit, we anticipate reducing gas bill by 30% and the electric bill by 42%.

Bottom Line:

- Not only did we improve the appearance of the equipment, we also dramatically improved the energy consumption.
